

## DAN WIEGANDT, AIA, LEED AP Engineering Manager

---

### Accountability & General Experience

As Engineering Manager for Austin Consulting, a division of The Austin Company, Mr. Wiegandt is responsible for facilities engineering consulting work performed for Austin Consulting clients. His responsibility places a strong emphasis on quality, cost-effective facility planning and engineering design solutions.

Mr. Wiegandt has 29 years of professional facilities design and engineering experience, 18 years with Austin.

His experience has provided him with a thorough working knowledge of facility planning, design and construction procedures from inception through engineering, estimating, scheduling, purchasing, and construction. He has demonstrated the ability to accomplish successful results for building programs, based on a unique combination of technical knowledge, practical judgment, and overall management skills.

Mr. Wiegandt's experience provides a solid base for meaningful understanding of the technical, cost, and schedule considerations that must be optimally addressed in order to achieve a successful project.

Mr. Wiegandt has managed design and engineering efforts on more than 100 major projects for clients worldwide, along with an equal number of feasibility and planning studies. These have included projects supporting: aerospace and aviation; education; entertainment and hospitality; food processing; general manufacturing; information processing; newspaper publishing; pharmaceutical and medical products manufacturing; physical distribution; research and development; and, television broadcasting.

Clients have included: aerospace companies; financial institutions; machinery manufacturers; food processors; pharmaceutical, medical and consumer products companies; commercial airlines; major daily newspapers; television broadcasters; and federal and local government agencies.

In addition to his experience with Austin, Mr. Wiegandt has worked for Jacobs Engineering and Sverdrup Engineers.
